EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science And Engineering , **CGPA: 9.07/10**

Bhopal, MP

Sep 2023 – Present

ST. Joseph's Convent Sr. Sec. School

Higher Secondary Education (Class XII) , **87.8%**

Sagar, MP

April 2022 – May 2023

ST. Joseph's Convent Sr. Sec. School

Secondary Education (Class X) , **96.83%**

Sagar, MP

April 2020 – Aug 2021

TECHNICAL SKILLS

Languages: Java, Python, SQL

Frameworks/Libraries: OpenCV, Matplotlib, TensorFlow, Streamlit

Frontend : HTML, CSS, Bootstrap, JavaScript

Relevant Courses: OOP, DBMS, DSA, Operating System, Software Engineering, Machine Learning, Deep Learning

EXPERIENCE

XYlofy AI | Machine Learning Intern

June 2026 – July 2026

Sales Forecasting & Demand Intelligence System (Python, XGBoost, Streamlit)

🌐 Live Demo

🐙 GitHub

- Built an end-to-end Sales Forecasting & Demand Intelligence System using XGBoost, Streamlit, and Scikit-learn, achieving the best forecasting accuracy (MAE: 14,443.46, MAPE: 14.45%).
- Implemented K-Means clustering for product demand segmentation and Isolation Forest for anomaly detection to support data-driven inventory planning.

PROJECTS

HemoTrace - Fingerprint-Based Blood Group Classification Using Deep Learning

🌐 Live Demo

🐙 GitHub

Tech Stack: Python, TensorFlow, Keras, EfficientNetB0, Streamlit, TensorFlow Lite, NumPy, Matplotlib

- Developed a research-oriented deep learning application to classify **8 blood group categories** from fingerprint images using **EfficientNetB0** transfer learning.
- Trained and evaluated the model on an **8,000-image dataset** with an **80:20 train-test split**, achieving **50.6% classification accuracy**.
- Built an end-to-end ML pipeline including image preprocessing, transfer learning, evaluation, and deployment through an interactive **Streamlit** web application.
- Compared multiple architectures and preprocessing techniques, including **EfficientNetB0**, **MobileNet V2**, **CLAHE**, and **Gabor filtering**, and deployed the best-performing **TensorFlow Lite** model.

True Care – Hospital Management System (MERN)

🌐 Live Demo

🐙 GitHub

Tech Stack: MongoDB, Express.js, React.js, Node.js

- Developed a full-stack Hospital Management System to streamline patient, doctor, and appointment management with deployment on **Netlify**.
- Built secure RESTful APIs using **Node.js** and **Express.js** for handling healthcare data and system operations.
- Designed responsive user interfaces with **React.js** for patient registration, appointment booking, and administrative workflows.
- Implemented CRUD functionality for managing patients, doctors, appointments, and medical records using **MongoDB**.

ACHIEVEMENTS

- Selected as a **Tech Contributor** in **GSSoC 2025 (GirlScript Summer of Code)** for contributing to open-source software projects.
- Secured **Rank 500/ 11,000+ participants** in GFG Institution rank.
- Ranked in the Top 2% nationwide in NPTEL – Introduction to Machine Learning.
